SUMMARY

I am an innovative and results-driven Web Developer and Machine Learning Enthusiast with comprehensive hands-on experience in full-stack development and software engineering. My expertise encompasses designing scalable, user-friendly applications and managing both front-end and back-end systems. I am seeking a full-time Software Developer role where I can leverage my technical skills to create innovative and effective software solutions.

EXPERIENCE

Web Development Intern

Pehchan

07/2024 - 09/2024

Mumbai, India

- I utilized Fabric.js to develop interactive and customizable components, enhancing the overall user experience.
- Developed custom clothing and e-commerce websites from the ground up, managing both front-end and back-end.
- Designed and optimized database structures to enhance performance and scalability.

Software Engineer Intern

Cillyfox Co.

03/2023 - 04/2023

Mumbai, India

- Designed and developed responsive websites using Wix Studio for enhanced user experience.
- We have integrated payment gateways and WhatsApp chat APIs to optimize customer interactions and improve the overall experience.
- I actively participated in a collaborative team environment, focusing on effective communication and comprehensive project coordination.

Technical Head

Mozilla Campus Club

09/2023 - 01/1970

Pune, India

- Led and mentored a diverse technical team to design and execute open-source initiatives, workshops, and tech events.
- Engaged in collaboration with industry experts and academic faculty to design and implement innovative programs.
- Oversaw project development and execution, ensuring the successful implementation of technical solutions.

EDUCATION

B.Tech in Electronics and Telecommunications

Bharati Vidyapeeth College of Engineering

08/2021 - 05/2025

High School (XI-XII)

MKVVVV

07/2019 - 05/2021

Mumbai

Leadership qualities that drive team performance and project outcomes.

Effective Communication

Effective Communication that fosters teamwork and clarity in project requirements.

SKILLS

AWS	Docker	CSS	ExpressJS
Git	HTML	Java	Javascript
Linux	MongoDB	MySQL	Next.js
NodeJS	Postgresql	Python	
Reactjs			

PROJECTS

E-commerce Web Application (Try here)

- E-commerce Web Application
- Developed an online store for tailored-fit dresses using ReactJS, NodeJS, ExpressJS, and TailwindCSS.
 - We successfully integrated secure payment processing and enhanced the efficiency of the checkout process.

3D Customizable Clothing Platform (Try here)

- 3D Customizable Clothing Platform
- Built an interactive 3D t-shirt customization tool with Three.js, ReactJS, and OpenAI API.
 - Enabled real-time 3D preview and personalized designs for users.

Kids' Skincare E-commerce Website (Try here)

- Kids' Skincare E-commerce Website
- I successfully developed an e-commerce platform utilizing Next.js 14, which features seamless integration with the Razorpay payment gateway.
 - I successfully implemented an admin panel designed for real-time order tracking and effective sales management.
